369-26 regarding Flock review
335-26 regarding Inclusionary Zoning

Dear City Council Members:

I am writing in support of two agenda items and will keep my comments brief.

First, I support resolution 369-26 to review the Flock program in Malden. More than 25 municipalities in Massachusetts have rejected AI-powered mass surveillance, according to the state ACLU, and many of them had far fewer cameras than Malden. Thank you for proposing a review to allow Malden officials and residents to have an informed discussion about the impacts of these cameras and potential paths forward.

Second, I support the proposed amendments to Inclusionary Zoning in 335-26, especially the changes to the parking requirements, and appreciate the consideration of affordable housing as a top priority.

Thanks for your time,
Shaleen Title
33 Bowers Ave
